

Meridian Forge Evidence Packet

Week 1 Case Materials for Systems Analysis and Design

Use this packet to distinguish what the case records prove from what the investigation still needs to establish. Preserve the source of each statement before you add it to your Problem Brief.

CASE	ORGANIZATION	ARTIFACT
The Process Below	Meridian Forge Robotics	Problem Brief

How to Use the Evidence

Read each record before deciding what it means. A record can support a fact, expose an assumption, or create an investigation question. Do not recommend a repair in Week 1.

Evidence label	Use this label when
Fact	A statement the available source directly supports
Assumption	A claim that extends beyond what the source proves
Question	An unresolved item that requires another record, person, or test

Incident Log

SOURCE Nia Voss - Night QA Supervisor

The first record of the repeated test and the stop request that did not stop it.

Recorded Details

Record field	Recorded detail
02:13:07	MR-17 accepted TEST_K44_START
02:13:09	The repeat cycle began
02:14:02	The operator stop request returned ACTIVE_INSTRUCTION_PENDING

Evidence Classification

STATEMENT MR-17 accepted TEST_K44_START at 02:13:07

☒ **Fact** ☐ **Assumption** ☐ **Question**

Analyst Notes

Current Scheduler

SOURCE Current scheduling console

The active scheduling system does not show the test the robot is performing.

Recorded Details

Record field	Recorded detail
Active assignment	MR-17 has no active test assignment
Current catalog	Test K-44 does not appear in the current test catalog

Evidence Classification

STATEMENT Another scheduling service assigned Test K-44 to MR-17

☐ Fact ☒ Assumption ☐ Question

Analyst Notes

Maintenance Record

SOURCE Maintenance archive

K-44 was retired, but the record does not prove every related service was removed.

Recorded Details

Record field	Recorded detail
Retirement date	Test K-44 was marked retired 186 days before the incident
Recorded action	The record says the test was removed from the active workflow
Unverified scope	The record does not confirm that every copy, service, or schedule was removed

Evidence Classification

STATEMENT Was Test K-44 removed from every service and schedule?

☐ Fact ☐ Assumption ☒ Question

Analyst Notes

Command Telemetry

SOURCE Elias Chen - Robotics Systems Engineer

The robot received a valid command through an accepted internal interface.

Recorded Details

Record field	Recorded detail
Command format	The command was validly formatted
Source label	legacy_sync.exe
Current limit	The telemetry does not identify the service owner or prove the broader cause

Evidence Classification

STATEMENT legacy_sync.exe caused the entire incident.

☐ Fact ☒ Assumption ☐ Question

Analyst Notes

Staff Statements

SOURCE Mara Ilyan - Production Operations Manager

Each person reports a different part of the incident and protects a different operational priority.

Recorded Details

Record field	Recorded detail
Nia Voss	MR-17 behaved normally before the incident
Elias Chen	A controlled restart may clear the active state
Mara Ilyan	Production has paused in the affected QA cell

Evidence Classification

STATEMENT Mara reports that production has paused in the affected QA cell

☒ **Fact** ☐ **Assumption** ☐ **Question**

Analyst Notes

CASE CLOSEOUT

Evidence Review Checklist

- ☒ I reviewed all five records.
- ☒ I preserved source names and recorded details.
- ☒ I separated facts from assumptions.
- ☒ I recorded questions the evidence does not answer.
- ☒ I did not recommend a solution in the Week 1 Problem Brief.

Next Action

Return to the Week 1 Nexus assignment. Use these records to complete the Problem Brief, generate the Mission Receipt, and submit the required link and receipt code in Canvas.
